# ADOPTING THE RATIONAL UNIFIED PROCESS

Success with the RUP

This book describes precisely what needs to be accomplished in order to successfully implement the IBM Rational Unified Process as a new process within an organization. All aspects of the process implementation are covered. The reader will find a management-perspective description of the RUP, and details on the effects that the RUP has on projects. In exploring an actual implementation, the authors stress the importance of communicating the reasons for adopting RUP, advice on selecting adoption strategies connected to an implementation plan. A discussion of implementation best practices and proven ways to use mentoring support is included. The book ends with descriptions from actual implementations. All of the above is based on the authors' experiences in helping companies implementing the RUP. The authors' share real-world examples from their previous engagements throughout the book.

## ABOUT THE AUTHORS

STEFAN BERGSTRÖM formerly worked for Ericsson Corporation in different positions as a project and process manager. He joined Rational Software in November 1998. He has been a mentor and an instructor since then, helping several of Rational's customers in Sweden implementing the RUP. He now manages the training business at Rational in Scandinavia.

LOTTA RÅBERG started as a software developer at a consultancy company where she took part in various software development projects. Her special interest in visual modeling made her join Rational Software in May 1995. She has gained solid real-life experiences of RUP through consulting and mentoring at a variety of organizations helping them succeed with their RUP implementations.
